Contents of Volume 88

Number 1, 7 January 1981

CASOLARI, A., A Model Describing Microbial Inactivation and Growth Kinetics 1

FIELDS, J. H. A. and QUINN, J. F., Some Theoretical Considerations on Cytosolic Redox Balance During Anaerobiosis in Marine Invertebrates 35

BREMER, H. and CHUANG, L., The Cell Cycle in *Escherichia coli* B/r 47

WICHMANN, H. E. and GERHARDTS, M. D., Platelet Survival Curves in Man Considering the Splenic Pool 83

CHARLESWORTH, B. and CHARNOV, E. L., Kin Selection in Age-structured Populations 103

BHATIA, K. and WILSON, S. R., The Application of Gene Diversity Analyses to Surname Diversity Data 121

SILVIUS, J. R. and MCELHANEY, R. N., Non-linear Arrhenius Plots and the Analysis of Reaction and Motional Rates in Biological Membranes 135

WEINBERG, J. and SAHINI, V. EM., Xylidine Isomers. VII. Structure–Hepatotoxic Activity Relationships of some Xylidines . . 153

MURRAY, J. D., A Pre-pattern Formation Mechanism for Animal Coat Markings 161

Number 2, 21 January 1981

PATE, E. F. and ODELL, G. M., A Computer Simulation of Chemical Signaling During the Aggregation Phase of *Dictyostelium discoideum* 201

GAILIT, J. O. and FREDERIKSEN, D. W., Possible Palindromic DNA 241

BROWN, C. E., Interactions among Carnosine, Anserine, Ophidine and Copper in Biochemical Adaptation 245

ISHIDA, K., Non-equilibrium Thermodynamics of the Selection of Biological Macromolecules 257

WEEKLEY, L. B., On the Neurogenic–Neuroendocrine Regulation of the Pancreas 275

KUEHN, L. A., Implications of Athlete's Bradycardia on Lifespan 279

MACMAHON, J. A., SCHIMPF, D. J., ANDERSEN, D. C., SMITH, K. G. and BAYN, R. L. JR., An Organism-centered Approach to some Community and Ecosystem Concepts 287

SPERTELL, R. B., On the Transmission of External Pressure Fluctuations to the Cerebrospinal Fluid 309

BELL, R. C. and HUNTER, J. E., Periodic Majority Recoding and Reverberatory Memory 323

PLATT, E., ROBSON, B. and HILLIER, I. H., *Ab initio* Refinement of an Orbital-centered Force Field for Biomolecules: Orbital Localisation and Parameterisation of the C–O–P(O_2)–O–C Fragment of Nucleotides 333

AARNÆS, E., THORUD, E. and CLAUSEN, O. P., Model Analysis of Circardian Rhythms in Mouse Epidermal Basal Cell Proliferation 355

LEWIS, J., Simpler Rules for Epimorphic Regeneration: The Polar-Coordinate Model Without Polar Co-ordinates 371

Number 3, 7 February 1981

KANANYAN, G. KH, RATNER, V. A. and TCHURAEV, R. N., Enlarged Model of Lambda Phage Ontogenesis 393

SHULMAN, M. J., STEINBERG, C. M. and WESTMORELAND, N., The Coding Function of Nucleotide Sequence can be Discerned by Statistical Analysis 409

STANFORD, J. M. and WU, T. T., A Predictive Method for Determining Possible Three-dimensional Foldings of Immunoglobulin Backbones Around Antibody Combining Sites 421

YADAV, J. S., LABISCHINSKI, H., BARNICKEL, G. and BRADACZEK, H., Quantum Chemical Studies on the Conformational Structure of Bacterial Peptidoglycan. I. MNDO Calculations on the Glycan Moiety 441

BIVAS, I. and PETROV, A. G., Flexoelectric and Steric Interactions between Two Bilayer Lipid Membranes Resulting from their Curvature Fluctuations 459

KAINA, B. and MEISTER, A., On Time Dependency of Frequency and Distribution of Chromatid Aberrations Induced by Mutagens with Delayed Effects. An Interpretation 485

KATSURA, I., Assembly Systems in Molecular Biology: A Graph Theory of Genetic Complementation between Two Related Species 503

STOUT, D. G., Dehydration Strain Avoidance and Tolerance in Plant Cold Hardiness 513

FAJSZI, Cs. and CZÉGÉ, J., Amplification of Asymmetry in Polymerization 523

WIEGEL, F. W. and PERELSON, A. S., Configurations of a Polymeric Antigen Adsorbed to a B-cell Membrane 533

DASGUPTA, A., SEN, D. and DAS, J., On Membrane Transport and Internal Entropy Production 569

MIKULECKY, D. C. and FEHER, J. J., The Relation between Local and Global Transport Parameters in an Epithelial Membrane having an Asymmetric Transport Mechanism 575

LETTERS TO THE EDITOR

BREED, M. D. and BEKOFF, M., Individual Recognition and Social Relationships 589

BARNARD, C. J. and BURK, T., Individuals as Assessment Units—Reply to Breed and Bekoff 595

Number 4, 21 February 1981

LARTER, R. and ORTOLEVA, P., A Theoretical Basis for Self-electrophoresis 599

BLOMBERG, C. and EHRENBERG, M., Energy Considerations for Kinetic Proofreading in Biosynthesis 631

LUNDSTRÖM, I. and NYLANDER, C., A Possible Model for Receptors in Excitable Membranes 671

POWERS, H. J., THURNAM, D. I. and DUGDALE, A. E., Is Red Blood Cell Survival Limited by the Activity of a Critical Enzyme? . 685

DAY, J. and WILLIS, C. R., Determination of the Single Chain Density of States for Membrane Systems 693

SCHOOLFIELD, R. M., SHARPE, P. J. H. and MAGNUSON, C. E., Non-linear Regression of Biological Temperature-dependent Rate Models Based on Absolute Reaction-rate Theory . . 719

ABUGOV, R., Non-linear Benefits and the Evolution of Eusociality in the Hymenoptera 733

ABUGOV, R. and MICHOD, R. E., On the Relations of Family Structured Models and Inclusive Fitness Models for Kin Selection . 743

LETTERS TO THE EDITOR

YOUNG, J. P. W., Sib Competition can Favour Sex in Two Ways 755

CRAIG, R., The Theoretical Possibility of Reverse Translation of Proteins into Genes 757

Index to Volume 88

AARNÆS, E., THORUD, E. and CLAUSEN, O. P., Model analysis of circadian rhythms in mouse epidermal basal cell proliferation, 355

ABUGOV, R., Non-linear benefits and the evolution of eusociality in the hymenoptera, 733

ABUGOV, R. and MICHOD, R. E., On the relations of family structured models and inclusive fitness models for kin selection, 743

Adaptation, biochemical, interactions among carnosine, anserine, ophidine and copper in, 245

Age-structured populations, kin selection in, 103

Aggregation phase of *Dictyostelium discoideum*, a computer simulation of chemical signaling during, 201

Amplification of asymmetry in polymerization, 523

Anaerobiosis in marine invertebrates, some theoretical considerations on cytosolic redox balance during, 35

ANDERSEN, D. C. (see MACMAHON, J. A.), 287

Animal coat markings, a pre-pattern formation mechanism for, 161

Anserine, carnosine, ophidine and copper, interactions among, in biochemical adaptation, 245

Antibody combining sites, a predictive method for determining possible three-dimensional foldings of immunoglobulin backbones around, 421

Antigen, polymeric, adsorbed to a B-cell membrane, configurations of, 533

Arrhenius plots, non-linear, and the analysis of reaction and motional rates in biological membranes, 135

Assembly systems in molecular biology: a graph theory of genetic complementation between two related species, 503

Asymmetry in polymerization, amplification of, 523

Athlete's bradycardia, implications of, on lifespan, 279

Bacterial peptidoglycan, quantum chemical studies on the conformational structure of; MNDO calculations on the glycan moiety, 441

BARNARD, C. J. and BURK, T., Individuals as assessment units—reply to Breed and Bekoff (letter), 595

BARNICKEL, G. (see YADAV, J. S.), 441

BAYN, R. L. JR. (see MACMAHON, J. A.), 287

B-cell membrane, configurations of a polymeric antigen adsorbed to, 533

BEKOFF, M. (see BREED, M. D.), 589

BELL, R. C. and HUNTER, J. E., Periodic majority recoding and reverberatory memory, 323

BHATIA, K. and WILSON, S. R., The application of gene diversity analyses to surname diversity data, 121

Bilayer lipid membranes, two, flexoelectric and steric interactions between, resulting from their curvature fluctuations, 459

Biochemical adaptation, interactions among carnosine, anserine, ophidine and copper in, 245
Biological macromolecules, non-equilibrium thermodynamics of the selection of, 257
Biological membranes, non-linear Arrhenius plots and the analysis of reaction and motional rates in, 135
Biological temperature-dependent rate models based on absolute reaction-rate theory, non-linear regression of, 719
Biomolecules, *ab initio* refinement of an orbital-centered force field for; orbital localisation and parameterisation of the C–O–P(O_2)–O–C fragment of nucleotides, 333
Biosynthesis, energy considerations for kinetic proofreading in, 631
BIVAS, I. and PETROV, A. G., Flexoelectric and steric interactions between two bilayer lipid membranes resulting from their curvature fluctuations, 459
BLOMBERG, C. and EHRENBERG, M., Energy considerations for kinetic proofreading in biosynthesis, 631
BRADACZEK, H. (see YADAV, J. S.), 441
Bradycardia of athletes, implications of, on lifespan, 279
